

Food & Drink Policy

Updated: 08/24/2022

Policy

Events may choose to specify that food may only be consumed in designated areas within the venue. The designated areas should have increased ventilation via windows, doors, internal HVAC systems, or portable air filtration devices with high-efficiency particulate air (HEPA) filters. If used, these will be the only areas that masks may be off for a significant amount of time. Masks should only be removed right before eating and should be worn again as soon as the meal is over.

Masks may only be removed to eat or drink. It is recommended that attendees move more than 2m away from other individuals before removing your mask to eat/drink. You must put your mask back on immediately after eating/drinking.

It is recommended that all provided meals be pre-packaged for easy distribution and to minimize personal contact. Teams may bring and distribute their own food, provided there are no venue-specific rules.
